

# Your Shave, The Safe Way

# SHAVING TIPS

## SHAVING

- ✂ We recommend a clipper length of #1 to #4, and that you seek help from a professional hair stylist.
- ✂ We do not recommend blade shaves down to the skin.

## CLIPPING

- ✂ Any clippers used should be clean and well-oiled during use.
- ✂ Brush the clipper blades between each shave and wipe the blades with a cloth and a few drops of disinfectant.
- ✂ Every two or three shaves, you may need reapply clipper oil.

## COLOURING

- ✂ ACRF advises the use of non-permanent hair spray, wax or hair chalk to colour hair.
- ✂ Colour sprays can cause eye irritation, as such ensure that the individual's eyes are covered while their hair is being sprayed.

## USE OF ACRF PROMOTIONAL MATERIALS

- ✂ We have included in your pack promotional materials you can use for your event.
- ✂ Please contact us if you would like further materials.

## FIRST AID

- ✂ It is a good idea that a first aid kit is available during your shave in case of accidental injury.

## SLIP SLOP SLAP

- ✂ Your newly-shaved head may require extra protection from the sun.
- ✂ Please attempt to keep your head covered with a hat or beanie and apply a broad-spectrum sunscreen.
